

TAMINCO PRO GIT SP1

Product type

Dry preservative for mould control in feedstuffs

Key words

Preservation, antimould, energy and calcium source

PRODUCT PROPERTIES

Composition	Calcium propionate
Typical values	Propionic acid 77 %
Animal species	All species, in compound feed or feed raw materials.
Nutritional values	Dairy cows 8.91 MJ/kg NEL, Pigs 10.73 MJ/kg NE, Poultry 13.60 MJ/kg ME, Calcium 210 g/kg
Recommended dosage	Compound feeds (moisture content up to 16%) and TMR: 0.5 – 10 kg / ton depending on the moisture content, storage conditions, and initial microbial contamination
Appearance	White, almost odourless granules

Application

TAMINCO MOULD CONTROL SP1 prevents growth of mould and other harmful microbes in different types of feedstuffs. It also prevents recontamination after production of the compound feed.

Product is also a valuable source of organic calcium with low buffering capacity.

Product is also a valuable source of energy. In dairy cows it may overcome problems of sub-acute acidosis (ketosis) through neoglucogenesis and increases milk-yield.

Stability and storage

Stable for 2 years from date of production. Physical stability may change before end of shelf-life if not stored under cool, dry and well ventilated conditions.

Handling and transport

Not classified.

Packaging on request

25 kg bags

900 kg big bags

Certification

This product is produced and delivered under the scope of a GMP+ certified quality system.

Safety precautions

Please see the Material Safety Data Sheet before handling the material. This product is produced in The Netherlands.

Warranty: This information herein is offered as a guide and is believed to be accurate and reliable as of the date of the printing. The values given are not to be considered as a warranty and they are subject to change without prior notice.
